Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Lijima 4,108,337.

Lijima discloses a powder body metering apparatus (col. 1, ll. 6-10), which comprises a metering container including a first cylinder an inlet (13) in an upper end as seen in Figure 1, a separate second cylinder (14) arranged so as to be freely adjustable in position with respect to the first cylinder as seen in Figure 1, a switch valve for opening and closing the inlet of the metering container (col. 2, ll. 19-31), wherein an internal capacity (15) of the metering container is variable by adjusting the position of the second cylinder with respect to the first cylinder (col. 2, ll. 35-62), wherein a first opening (32) being provided in a lower portion of the metering container and a separate second opening (34) being provided in a desired portion, wherein the first opening and the second opening are each spaced from the inlet, the first opening communicating with the second opening through the metering container as seen in Figure 1, wherein a powder body discharge port (35) is formed in the lower portion of the metering container.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Lijima 4,108,337 in view of McKinney 4,002,268.

Lijima has taught all the features of the claimed invention except that the powder body discharge port is freely opened and closed by a closing member. McKinney teaches the used of a body discharge port (2) having a closing member (3).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide McKinney's closing member (3) onto the discharge port of Lijima, in order to provide a means of controlling the fill material onto the hopper.

Response to Arguments

5. Applicants' arguments filed 12/13/2007 with respect to claims 1 and 2 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
